

Data Resources

The College of Health and Human Services has access to a number of secondary datasets through collaboration with the UNCC School of Data Science (SDS) and the Institute for Social Capital (ISC). These datasets include valuable information on homelessness, incarceration, social services, and school district data. The SDS also currently manages access to a compilation of global Twitter data that can be queried based on keywords and themes such as the Covid-19 pandemic.

The Institute for Social Capital, Inc. (ISC) is a signature research initiative of the UNC Charlotte Urban Institute. ISC uses integrated administrative data to increase the community's capacity for data-informed decision-making and foster university research that impacts the community and deepens understanding of complex community issues. By linking data across agencies, sectors, and programs, the ISC integrated data system allows community stakeholders to understand challenges and opportunities beyond typical service silos.

The School of Data Science (SDS) at UNC Charlotte is an industry-university-state partnership, led by the College of Computing and Informatics, the Belk College of Business, the College of Health and Human Services, and the College of Liberal Arts and Sciences.
